

TRON DJ SHOW

TECHNICAL REQUIREMENTS

DJ BOOTH REQUIREMENTS

- The preferred height for the deck setup is 100cm.
- The DJ deck must be at least 3 meters wide by 1 meter deep.
- Equipment should be placed on a flat, solid and stable surface, free from any vibration and movement.
- The booth must be installed at the level of the dance floor. The DJ privileges the proximity to the dancers. The symbiosis between music, DJ and dancers flows more naturally. If this is not possible, take into account the following:
 - Stage area shall be stable and structurally safe (electrical system earth connected);
 - Stage covering is mandatory should the DJ's performance be outside.
- Booth must be draped at the front and sides all the way to the floor, to hide wiring.
- The DJ booth and equipments must have good lighting but no direct spotlight on the DJ. DJ prefers dimmed atmosphere.
- A separate table or raised surface (50-60cm high) is required in order to accommodate drinks and other belongings. It shall be placed on one of the sides of the DJ's position.

TECHNICAL REQUIREMENTS

SET UP

1x PIONEER DJM :
